

CLAIMS

We claim:

1. A cigarette extender on a self-rolled cigarette, comprising:

cigarette paper having a length and a width, and a glued strip along the length for sealing;

a quantity of cigarette tobacco;

a strip of stiff paper tipping having a minimal width and a length coextensive with the length of said cigarette paper; and

said stiff paper tipping attached to said cigarette paper along its length and, resulting upon rolling the cigarette, forms a cigarette extender portion;

whereby upon completion of the production of a rolled cigarette with tobacco, a smoker holds the stiff paper portion in his/her mouth for smoking, resulting in less tar and the like intake of deleterious materials.

2. The cigarette extender according to claim 1, wherein the stiff tipping paper has a minimal width dimension of one-eighth of an inch.

3. The cigarette extender according to claim 1, wherein the stiff tipping paper overlaps the cigarette paper along its length.

4. The cigarette extender according to claim 1, wherein the stiff tipping paper is applied to the stiff tipping paper by a non-harmful adhesive.
